

Future Makers Funding Program

The Future Makers is a joint funding program of Technology Industries of Finland Centennial Foundation and Jane and Aatos Erkkö Foundation. The aim of the program is to initiate ambitious scientific research projects that are relevant to the future of the Finnish industries and the society. The funding call is open to all Finnish universities.

High-level research opening is:

- multidisciplinary and builds an ecosystem
- based on an important challenge from the point of view of the Finnish Technology Industries and the Finnish society
- aiming for an international breakthrough

Key focus areas are f.ex. artificial intelligence, data-based materials science and technology, platform economy and smart manufacturing.

The funding call has two stages:

- 1. Call for ideas 1.2.–31.5.2019**
- 2. Improving of the ideas and final applications 5.9.–18.10.2019**

More information about the program [here](#).
